Summary and Recommended Investment Strategy.

Our forecasts for the Australian and New Zealand stockmarkets are only Neutral, but remain close to fully invested in the recommended shares.

Investment Outlook.

Weak US stock prices - especially in the Technology sector - over the last month has been reflected in nervousness on the Australian stockmarket. We believe the global economic recovery will be slow and only moderate - so the stockmarket recovery will climb this wall of worry and periodically slip back. We also remain cautious about many Technology share valuations as a return to the previous boom is unlikely.

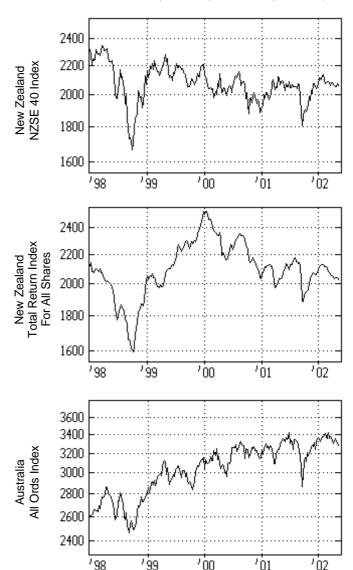

Despite slow economic growth, we still believe that excellent investments can be made in cyclical and emerging growth/technology company shares - that trade at low valuations. Many cyclical shares (e.g. Colonial Motor, Steel & Tube, Julia Ross, Skilled Engineering) were depressed over recent years and now offer excellent value. Cyclical shares are best purchased (1) after a period when the share price has suffered a significant decline but is beginning to recovery, (2) when profitability has collapsed, but stabilised or is showing the first signs of improvement, (3) when media reports are negative and (4) while other investors are still avoiding these depressed sectors.

Technology related shares are also depressed following the 1998-2000 boom and subsequent bust. What we look for in this sector, however, is not revolutionary technology - which is often obsolete in six months when something better is invented. What is attractive is a company with a strong business generating revenues and profits - that will benefit from growth caused by technology. For example, Cellnet Telecommunications' rapid revenue growth as demand for cellular phones remains strong (i.e. new technology results in demand as consumers upgrade) and increased market share as network operators outsource this part of their business to reduce costs.

Our Forecasts for the Australian and New Zealand stockmarkets remain only Neutral. We shall remain close to fully invested in shares, but build a small cash reserve to fund future new share investments.

Performance Forecasts

"Performance Forecasts" are computer generated predictions of the relative future price performance of a company's shares over the next three to six months. Performance Forecasts are calculated for every listed NZ share (except Investment Trusts) on a rating scale using the letters "A" (Highest potential for capital appreciation over the next 3-6 months), "B" (Above Average), "C" (Average), "D" (Below Average) and "E" (Lowest). These predictions are NOT buy or sell recommendations, but can be useful to help time planned purchases or sales, or to identify shares worthy of further study and analysis.

Recommended Investments

At its Annual General Meeting, <u>CDL Investments</u> has reported strong residential section sales, with revenues up 94%, for the March quarter.

The parent company, **CDL Hotels**, which owns 60.1% of CDL Investments and 50.7% of **Kingsgate**, will also consider restructuring the group. This *could* involve merging the three companies or splitting into two separate companies. This second proposal would involve liquidating Kingsgate and transferring its hotel assets to CDL Hotels and its property assets to CDL Investments. This could be followed by CDL Hotels distributing its CDL Investment shares to its own shareholders.

<u>Nuplex Industries</u> has made a takeover bid for Australian listed **Asia Pacific Specialty Chemicals** - which has been planning to merge with another listed Australian company, **Symex Holdings**, since last November.

Symex Holdings approached Asia Pacific Specialty Chemicals in early November 2001 and the two companies agreed to merge. This was to be via a scheme of arrangement including Asia Pacific Specialty Chemicals paying a dividend to its shareholders, but the Australian Tax Office would not agree to certain aspects. A third party - probably Nuplex Industries - approached Asia Pacific Specialty Chemicals in March, indicating its interest in making a takeover bid. Symex Holdings moved to strengthen its position by acquiring a 19.99% shareholding in Asia Pacific Specialty Chemicals in late March and the merger was called off in early April owing to problems with the scheme of arrangement.

In April, Symex Holdings (Continued on Page 4)

The average Total Return (i.e. both Capital Gains/Losses plus Dividends received) of all current investments from initial recommendation is +119.7%. This is equal to an average annual rate of +32.4%, based upon the length of time each position has been held.

The average annual rate of gain of ALL recommendations (both the 33 current and 115 closed out) is +30.5%, compared with a market gain of +9.8% (by the SRC Total Return Index).

CURRENT ADVICE is either Buy, Hold+, Hold, Hold- or Sell.Hold+ indicates the most attractive shares not rated as Buy.Hold- indicates relatively less attractive issues.

^{*} Initial Recommendation Prices adjusted for Share Splits, Bonus and Cash Issues.

⁽¹⁾ Toll Holdings notes (TOLG) last traded at 3395 cents.

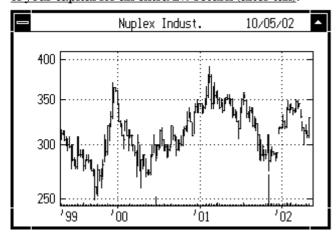

Recommended Investments (Continued from Page 3) made a 65 cents cash takeover offer for Asia Pacific Specialty Chemicals. This was over-bid by Nuplex Industries last week which is offering 70 cents per share (A\$47 million for the whole company). Nuplex Industries has also started to purchase Asia Pacific Specialty Chemicals shares on-market at 70 cents, building up a stake of 6,520,187 shares (9.74% of the company).

Both the Symex Holdings and Nuplex Industries takeovers are conditional on 90% acceptances and both companies have the shareholdings (i.e. 19.99% and 9.74%, but growing) necessary to block each other's bid. So the only way for either party to succeed is for the rival bidder to withdraw and sell. The most likely outcome at this stage is that the parties will continue to over bid each other. Acquiring Asia Pacific Specialty Chemicals will therefore probably cost significantly more than A\$47 million although the loser will make a capital gain on selling their existing shareholding.

Speculators seeking to realise a short term gain from a possible bidding war could consider buying Asia Pacific Specialty Chemicals shares on-market at 71 cents and waiting for higher bids.

Whether or not Nuplex Industries succeeds in this takeover, the company is planning to raise NZ\$60-75 million from the issue of five-year Capital Notes offering an interest rate of 9.7%. While Nuplex Industries is a sound company - and this is a high interest yield - we do not believe Capital Notes are a particularly sound investment. Capital Notes, often called "junk bonds" in more discerning countries, offer a fixed interest return but rank near the bottom of the list, just ahead of ordinary shareholders, to be repaid if the company is liquidated. So if Nuplex Industries ran into serious financial difficulties then both the Capital note holders and the shareholders would probably lose everything!

As a shareholder, we are prepared to take that risk. We *could* lose everything if the company does badly (although we have diversified our share portfolio, so that wouldn't be *too* bad) but we receive a 7.0% gross income and the potential for a *higher income* and *capital appreciation* if the company does well. Capital Note holders take the same risk of losing everything if things go badly, but will never get more than a 9.7% income yield no matter how successful the company! If you want a safe, fixed interest investment then put your money in a bank term deposit at 6.5% - don't risk 100% of your capital for an extra 2% return (after tax).

Last month when **Renaissance Corporation**'s Managing Director purchased 1,755,000 shares onmarket we wrote that "this confirms our view that the shares are under-valued". In fact, the AGM has reported a return to profitability...

Shareholders were told that by downsizing the business "the company is now in a stronger position to generate profits, and has done so every month this year". The Conduit business - that had previously been a drain on profits owing to its development and start-up costs - has "made a first-quarter profit and should continue to trade profitably".

<u>Wrightson</u> has reported a \$16.6 million profit for the nine months to 31 March. That is up 41.9% on the same period last year. All of the improvement, however, occurred in the six months to 31 December, with the last three months showing a profit of \$10.3 million (down slightly on the \$10.7 million profit in the March 2001 quarter).

Nevertheless this shows Wrightson has the potential to generate strong profits in the March quarter. Last year the company operated at close to break-even in the June quarter and a similar result this year will leave the annual profit at \$16.6 million (12.4 cents per share).

As Wrightson has very low debt levels it needs to retain little of its profit and can distribute most of it to shareholders. The annual dividend will therefore likely rise 25% to about 10 cents - offering investors a high 13.2% gross yield based upon the current share price of 113 cents

Wrightson shares are still under-valued, so offer investors a high current income yield and capital appreciation as the shares are re-rated. "Buy".

Wrightson has taken control of the *OneWool Establishment Group* and will set up a commercial structure that will link growers and processors with "supply, logistics, sales and marketing, through to end processing".

Australian Shares

(This section is in Australian currency, unless stated.) **Abigroup** has won a \$50 million, six-year contract to maintain the gas distribution network of **Multinet Gas**, Victoria's largest natural gas distributor.

Abigroup has also been named in connection with the development, construction and operation of a NZ\$50 million "Auckland SuperDome" at Quay Park for the **Auckland City Council**.

Austral Coal has scaled back entitlements to its recent placement to shareholders. Investors who applied for the maximum 6,660 shares will receive only 4,580 shares and a refund of \$936.

Austral Coal and other producers of coking coal are expecting a significant price increase in current negotiations with Japanese steel companies. Last year the average price paid to Australian producers was US\$42.75 a tonne, but a German steel producer last month signed a contract to buy from a Canadian coal company at US\$48 a tonne.

Biron Capital is making a 1 for 2 cash issue at 35 cents to shareholders to initially raise \$4.4 million. For every two shares already held, shareholders are being offered one new share *plus* a one-year option. The one-year option will raise a further \$5.0 million in 2003 if

investors exercise their right to purchase one share (at 40 cents) *plus* a two year option. That second option will give investors the right to buy another share in 2005 at 60 cents - raising up to another \$7.5 million.

Following on from April's \$1.2 million share placement (at 37 cents) Biron Capital is clearly looking to aggressively expand its property lending business. While this should be able to generate high profit margins, it does involve high risks. It is also a "no growth" business. To expand and grow profits the company will need to issue more shares to raise additional equity funding. This will expand the issued capital and dilute earnings per share. The only ways to increase earnings per share are through either (1) retaining funds for reinvestment (i.e. grow the business through *compound* interest) and (2) borrow funds on the money market at lower interest rates and lend out on high return/high risk property loans.

As we have stated previously, we don't see ourselves remaining a long term investor in Biron Capital. Other businesses involve lower risks and/or have the potential for better long term capital appreciation while having similar potential to produce a high income yield.

The current planned expansion will increase the issued capital which should improve the *marketability* of the shares and enable us to sell more easily without unnecessarily depressing the price.

We are not too interested in investing *new* money in Biron Capital. Fortunately the rights are being actively traded and at a premium to the share price, which reflects the value of the options. Therefore we recommend selling the Biron rights which are trading around $3\frac{1}{2}$ -4 cents.

Brazin shares have suffered from the manic-depressive nature of stockmarket investors. The shares recently hit a two-year high of 270 cents before plunging to a low of 190 cents, with high volumes of shares traded. The decline appears to be a result of inaccurate rumours of a deterioration in the company's relationship with **Virgin Group**. Virgin has recently reported an £82.7 million (A\$229 million) loss - mainly from writing down the 77 **Our Price** stores that it effectively gave away to Brazin late last year.

These UK music stores will be re-branded as *Sanity Music*. Two stores rebranded and redesigned have increased turnover in excess of 20% - leading Brazin to upgrade its profit forecast for this UK business for the period to June 2002. A break-even was forecast in the interim report, but the company now expects a profit of A\$2 million.

The company predicts that its full year profit (before abnormal items) to June 2002 will "be around \$21.5 million". That is down on the \$21.6 million *half* year result, but this is the normal pattern of profitability (i.e. all of the profit is earned in the six months to December, and the business breaks even in the six months to June).

The company is introducing an integrated point of sale system in its Australian *Sanity Music* stores. Rationalising its inventory holdings will result in a \$6 million(pre-tax)abnormal charge. The new POS system will allow the company to better manage inventories and reduce inventory levels - which requires less investment in working capital.

Brazin's *IN2Music* stores in Australia are being rebranded as *Virgin Music* and will be expanded from 55 to 100 stores. The first *Virgin Megastore*, re-opened on April 16, is reported to have increased revenues by 40%. The company plans to have around 20 new *Virgin Music* stores opened by next Christmas.

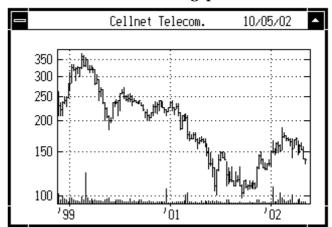

<u>Campbell Brothers</u> has warned the market that its profit for the year ended March 2002 will "fall some 5-10% below" the previous year owing to "extra fixed operating costs" from relocating the Cleantec division. Issued capital has also increased 20% owing to a 1 for 5 cash issue in June 2001. So earnings per share will be down 20-25%.

In recent months <u>Cellnet Telecommunications</u> has been distributing 100% of mobile handsets and accessories sold by **Telecom NZ** and the companies have formalised that arrangement with a two year exclusive agreement (with a two year renewal). Cellnet Telecommunications has purchased a new warehouse in Auckland for NZ\$3,175,000 to handle its expanding NZ business.

This Telecom NZ business is stated to be "worth A\$150 million per annum" - which appears somewhat high given that Cellnet Telecommunications' NZ sales were only A\$54.8 million for the year to June 2001. The company's *total* sales last year were only \$192.8 million, although revenues did rise over 50% to \$188.7 million in the six months to December. Even if the \$150 million figure is incorrect, Cellnet Telecommunications is clearly winning new business and generating very strong revenue growth!

Cellnet Telecommunications is also negotiating a similar outsourcing arrangement with Telecom's Australian subsidiary, **AAPT Cellular One**.

In March, **Vodafone** outsourced its handset distribution but split the contract between Cellnet Telecommunications and **Bridgepoint**.

<u>Commander Communications</u> has appointed Ian Tsicalis - formerly the Managing Director for **Howard Smith** (until it was taken over by **Wesfarmers**) - as its new Managing Director.

OAMPS has become the first Australian insurance broker to be accredited by Lloyd's of London. This improves the company's competitive position as it now has direct access to Syndicates. This will save the company paying commissions to an accredited UK broker when placing risks with syndicates and also will allow the company to earn commissions when acting for other Australian insurers. (Continued on Page 6)

Recommended Investments (Continued from Page 5)

OAMPS has acquired **Metropolitan Insurance Brokers**, a financial service and insurance broking business in Adelaide. This will add around \$1.5 million to annual premium revenues.

The company has also expanded its UK business with the acquisition of **Peter Sellers Insurance Brokers**. This business is expected to generate commissions of £360,000 (\$972,000), increasing the UK division's total commission income to around £2.0 million (\$5.4 million) annually.

Skilled Engineering continued to experience strong revenues and profits in its third quarter ended 31 March. Sales for the March quarter were \$143 million and earnings (before interest and tax) were \$4.0 million. The second half result is expected to be "about in line with the first half" which would put earnings per share at around $10\frac{1}{2}$ cents.

Toll Holdings' share price decline over the last month is the result of both (1) global stockmarket weakness and (2) a broker report pointing out possible "integration risk" with its rail acquisition. Nevertheless, Toll Holdings' Managing Director reports that integration is "proceeding well". The group's "trading levels continue to remain strong" and the company is confident of achieving its forecasts.

Toll Holdings is expanding in NZ with the acquisition of **BHP Stevedoring** and **BHP Transport & Logistics** (NZ) and an agreement to purchase a majority equity position in **Southern Distribution Centre**. The BHP businesses will "advance Toll's plans to be a major supplier of stevedoring services in Australian and NZ ports" and will help the company build road, rail and logistic services in NZ. Southern Distribution Centre is a warehousing and distribution business and will "form a growth platform for Toll in contract logistics".

We continue to view Toll Holdings as a growth business - but the share valuation is high and this investment has appreciated so much that investors will be over-weighted and should be looking to sell some shares to better diversify their portfolios. We formally recommended selling 20-25% of Toll Holdings shares last November (around \$29) and continue to rate the shares as "Hold-". We consider that "Hold-" means "hold for further gains" but also that (1) such shares are probably not suitable for new investment and (2) investors could consider realising partial profits - preferably selling into strength, not during periods of weakness - to help fund investment in other shares that trade at lower valuations and which hold better long term potential.

<u>Utility Services Corporation</u> has made two more acquisitions: **Corporate Network Solutions** which is involved in design, installation, systems integration, management and support of large-scale computer data networks, and **CANTEC Australasia** which designs, installs and services wireless communication systems for emergency, fire, security and surveillance.

Both businesses are "profitable and have strong growth profiles". They are being purchased for undisclosed considerations, payable in cash and shares, of an up-front fee and an earn-out based upon future operating performances. The final costs are expected to be "approximately three times" earnings (before interest and tax) - so these businesses are being acquired quite cheaply!

<u>Vision Systems</u> will suffer a sharp decline in profits this year owing to the global downturn and as it repositions Vision BioSystems to develop its own brand of high value, specialised, automated diagnostic equipment. The Vision BioSystems division will operate at a loss of \$2 million this year but profitability will return with the launch of new products in the new financial year. Across the whole group, six new products are planned for the new year.

Share Recommendation: Sell Thakral Holdings Group

SELL Thakral Holdings Group.

We are recommending the sale of **Thakral Holdings Group**. The group's share price has recovered slightly over the last month as it sold some non-core assets and upgraded its June 2002 profit forecast. The company had expected profits to fall this year - owing to the downturn in tourism - but now expects profits to be "approximately in line" with last year. We recommend taking advantage of this slight improvement in the share price to sell an investment that has not been too successful and realise cash that can be better invested elsewhere.

Our Investment in Thakral Holdings Group

Our decision to invest in Thakral Holdings Group in late 1998 was partially based upon having just realised a 3½-fold capital gain from the takeover of JNA Telecommunications and a small profit from the management buyout of Equitilink. Approximately 20% of this large cash holding was used to add to existing investments, 20% was invested in Flight Centre (sold two years later for a 6-fold gain), 20% went into Toll Holdings (which are up 15-fold) and 20% was invested in Vision Systems (up ½-fold). The performance of these emerging growth shares certainly far exceeded our expectations! But emerging growth shares can be risky - so we put 20% of the money in "a relatively low risk, high yielding investment" - Thakral Holdings Group.

Thakral Holdings Group also appeared attractive owing to *insider* buying (i.e. eight buys over the preceding

year) and was seeking to re-purchase 4% of its shares through an on-maket buy-back. Therefore, in addition to the low risk and high yield, we anticipated "steady capital appreciation over the next 18-24 months".

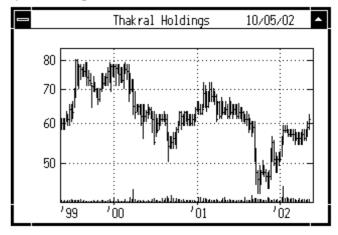

While Thakral Holdings Group is a sound company - and has sought to add shareholder value be expanding away from hotels into property development - it has simply failed to produce any meaningful growth. The high income yield has mainly been funded through a dividend re-investment scheme (as the company retained cash for internal growth) but this has steadily increased the issued capital and diluted earnings per share.

Summary and Recommendation

While Thakral Holdings Group has failed to live up to our initial expectations we have no regrets. Putting money in a low risk share like Thakral enabled us to take higher risks with investments in Flight Centre, Toll Holdings and Vision Systems! Now, however, the time has come to look to earn a better return than is likely from continuing to hold these Thrakal shares. Australian technology shares have fallen to low levels

STRENGTH RATING

and economic conditions have depressed cyclical shares to lows. So now is a good time to start looking for our *next JNA* or our *next Toll Holdings*. We therefore recommend the sale of Thakral Holdings Group shares to raise cash to fund future new share investments in *growth* and/or *cyclical* companies.

Page 8 Market Analysis

Computer Selections of Australian Shares based upon our Comprehensive Share Selection Criteria

See "Market Analysis" issues 298-301 or the Reprint sent to all new subscribers for details These shares are not formal "buy" and "sell" recommendations, but the "Under-Valued", "Best Performing", "Income" and "Insider Buying" shares should be considered for purchase, while the "Over-valued", "Worst Performing" and "Insider Selling" shares can be sold to release money for re-investment in more attractive shares.

the cree randa, well of creening and instact sening states can,	se sold to release money for re-in-estiment in more districtive shares.

We are currently building up a cash fund. My wife believes this to be a safe investment whereas I believe you can get a better return elsewhere with not much more risk. However I had my chance and blew it by losing so much money (i.e. \$10,000 on Wilson Neill and other shares that have devalued). Once the cash fund has reached \$10,000 (it's currently \$8,400) then I will get 25% of our \$1000 monthly savings to invest in the sharemarket.

I would appreciate if you could offer any advice. Shares: 589 Telecom, 1127 Waste Management, 1027 Briscoes, 383,450 Certified Organics, 1388 Rocom, \$500 in Indranet.

Answer: You are absolutely correct that the stockmarket offers "a better return with not much more risk" but you made two serious errors when trying to put this theory into practice. Firstly, your share selection was biased towards shares involving extremely high risks and, secondly, your portfolio was poorly diversified, with about 45% of your money in one holding. If you had spread your money over 8-12 shares, then you would have avoided much of your losses.

You need to become more sceptical of promoters claims of future company performance, adopt a sound investment strategy, diversify widely to reduce individual company risks and become more discriminating of the type of company in which to invest.

Your portfolio is currently worth around \$12,000 to which you will be adding about \$250/month in new savings. With this amount to invest you should be looking at about \$1500 per company. So start with 7-8 holdings and add another couple of holdings per year from new savings.

Certified Organics, Rocom Wireless and Indranet are not really suitable types of investments. Sell the Certified Organics (worth \$2,300), but Rocom (worth \$319) is probably not worth selling and there isn't any market to realise the Indranet investment.

I would also suggest selling about half of the Telecom, Waste Management and Briscoes shares to reduce those holdings to about \$1000-1500 each.

Those sales will realise about \$6,500 which can be used to invest in 4-5 new shares selected from "Market Analysis" (e.g. Steel & Tube, Wrightson, Campbell Brothers, Cellnet, McPhersons, Skilled Engineering).

This will give you a portfolio of 7-8 quality shares with good growth potential. Your \$250 of monthly savings (plus dividends) will need to be saved up until you have about \$1000-1500 (i.e. saved for 4-6 months) at which stage you can select a new share for investment. Page 10 Market Analysis

Australian Warrant/Option Analysis

(This section is in Australian currency, unless stated.)

Options are risky investments that often expire worthless! One risk with options can be a lack of marketability and very wide bid/offer spreads, both of which can make it difficult when buying or selling. Nevertheless, there are some *under-valued* and *highly leveraged* situations that offer the potential for very high returns. Any investment in options, however, should represent only a *very* small part of a diversified share portfolio.

Some options that currently look attractive - and which offer the potential for significant capital appreciation if the company's share price increases slightly - include **AP Eagers**, **Aberdeen Leaders**, **Euroz** and **Technology Investment Fund**.

AP Eagers (codes: share APE, options APEO).

The options of this motor vehicle dealer have regularly featured in our *Warrant/Option Analysis*. The shares now also qualify as a "Buy" under our *Comprehensive Share Selection Criteria* (i.e. *Under-Valued* and *Best Performing*), so we have written a *Company Analysis* of this company (see Page 13).

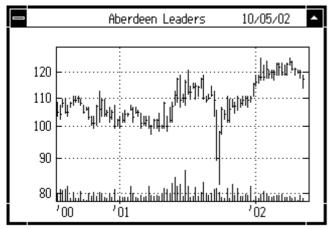

AP Eagers shares and options can both be inactively traded at times, but the options are very under-valued and offer very high leverage - so could yield a significant short term capital gain through to their final exercise date of 31 January 2003.

Aberdeen Leaders (codes ALR and ALRO).

This is an investment company - formerly named **Maxilink** - which invests in the Top 50 Australian listed companies while seeking to beat the market through a "growth at a reasonable price" approach.

The options are attractive as (1) they trade at a 62% discount to their fair value (i.e. the Black-Scholes model values the options at 20.8 cents), (2) they offer a very high leverage (so if the share price appreciates even only slightly the options will soar in value) and (3) they have a low Break-Even rate of just 5% (i.e. the share price needs to appreciate at just 5% per annum for the options to exceed their current 8 cents value at the final exercise date).

If the share price can appreciate just 10% per annum, the historical average rate of gain in the stockmarket, then the shares will rise 17% to 137 cents by 31 January 2004 and the options will be worth 19 cents - up 135%. A 20% per annum rate of gain will raise the shares to 158 cents and the options to 40 cents - up 400%.

Euroz (codes EZL and EZLO).

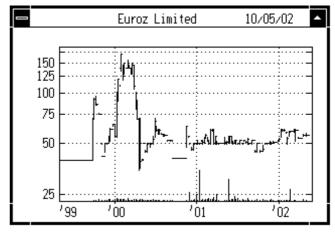

This company restructured in January 2000 to become a stockbroking business. In the year to June 2001 the company generated revenues of \$4.9 million and a profit of \$759,000 (4.1 cents per share). A 4.0 cents dividend was paid.

The company holds \$6.7 million (36 cents per share) in cash and has no interest bearing debts.

Although this is a very small company (i.e. the market capitalisation is just \$10.4 million) the shares and options are reasonably actively traded.

The options are *in the money* (i.e. the shares trade *above* the option exercise price of 50 cents), are undervalued, offer high leverage *and* have $2\frac{1}{2}$ years until their final exercise date (i.e. plenty of time for the shares to appreciate further in value).

Although there are many risks involved with *microcap* companies, this is a financially sound company with a profitable business. The options therefore appear to offer "investment quality" rather than being just "speculative" - although, of course, the profit or loss involved in owning options ultimately depends upon the performance of the company's share price.

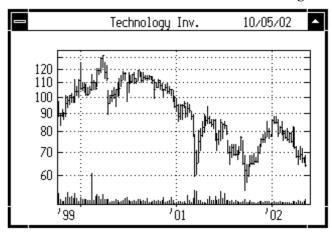

Technology Investment Fund (codes TIF and TIFOA). This is a listed investment company that has investments in about 40 technology shares listed in Australia or in the United States.

As at 31 December 2001 the portfolio was mainly invested in US equities (57% of the portfolio), with a smaller amount in Australian equities (38%) and a small cash holding (5%). Its top ten shareholdings were Australian listed Powertel, Nautronix, Primergy and

Scientific Services and US listed Intel, Symantec, Applied Materials, Check Point Software, American Power Conversion and Microsoft.

The options allow investors to buy shares at $80\,\mathrm{cents}$ on $16\,\mathrm{May}\,2003$ -so to have any value the share price will need to appreciate 25% in value over the next year. To recoup the 4 cents cost of the options the shares need to appreciate 32% (i.e. the Break-Even rate) over the next year. Further appreciation, however, would yield significant gains in the value of the options. If the shares appreciated 50% to $96\,\mathrm{cents}$ then the options would be worth $16\,\mathrm{cents}$ - up 300%.

This is a riskier option - and we *are* still cautious about Technology share valuations - but for a high risk/high return bet on a recovery in the Technology sector these options have got to be worthy of consideration!

Company Analysis: AP Eagers

(This section is in Australian currency, unless stated.)

AP Eagers (code APE) is a large motor vehicle dealer based in Brisbane. The company's January 2003 options (code APEO) have frequently featured in our quarterly Australian Warrant / Option Analysis. The shares have recently qualified as a "Buy" under our Comprehensive Share Selection Criteria - so the options should be attractive to investors looking for short term capital appreciation.

Company History

This Brisbane motor vehicle business started in 1912 and was incorporated as **EG Eagers & Son** in 1957 ahead of its listing on the Australian stockmarket. The company merged with another motor vehicle retailer, **AP Group**, in 1992.

Recent Results

Over the last ten years, AP Eagers has been a "no-growth" company with annual revenues relatively stable within the range of \$500-650 million. Profitability and dividends, however, have increased around 2-2½ times over the decade.

In the year to June 2001, revenues rose 35.4% to \$674.5 million and profits soared 45.6% to \$6,251,000 (40.4 cents per share). The annual dividend rose 16.7% to 28.0 cents.

Investment Criteria

At 486 cents, AP Eagers shares trade on an extremely low Price/Sales ratio of 0.11, a low Price/Earnings ratio of 12 and offer a high Dividend Yield of 5.8%.

The market capitalisation is just \$78 million making this a *smaller* listed company.

Management has a significant investment in this company. **WFM Motors** - a company owned by non-executive director NG Politis, owns 6,361,586 shares or 39.5% of the company. NG Politis gained control of the company in 2000, buying a 19.9% shareholding from the family of the former Managing Director A Piper who died in the previous year (although the Piper family still retain a 7.9% shareholding). WFM Motors acquired another 14.5% from **Damelian Automobile** and has been purchasing shares on-market. The current Managing Director, KW MacDonald has 8,800 shares and 100,000 options, Chairman BW MacDonald owns 62,500 shares and 12,500 options, while non-executive director AJ Love has an investment of 13,750 shares and 2,750 options.

There have been two insider buys over the last year. In March 2002, NG Politis purchased 131,293 options on-market at 35 cents and in April he purchased 181,901 shares on-market at \$4.50.

The shares are *neglected* by brokers, with only one firm publishing profit forecasts. The shares are also *neglected* by institutional investors, with none of the big

institutions owning shares in AP Eagers. A handful of the listed investment companies (e.g. Milton, Argo) own a total of less than 10% of the company.

Technically, AP Eagers shares are very attractive. The share price has risen strongly over the last four months - moving to an all-time high above 485 cents in March and April. This new uptrend has also moved the Relative Strength Rating to +10.1%, ranked 24. It is quite likely, therefore, that the shares will continue to appreciate strongly in the immediate future.

January 2003 Share Options

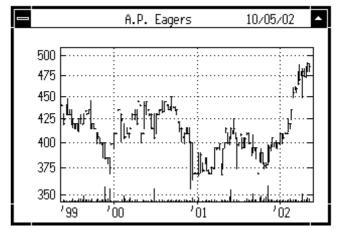

The listed share options (code APEO) offer investors the right to buy a new share at \$4.00 on 31 January 2003.

With the shares trading around 486 cents the *intrinsic* value of the options is 86 cents yet they are quoted at 46-50 cents!!

Furthermore, the options offer *high leverage* over the next 8½ months until their final exercise date. Every 1% gain in the share price will add 10.6% to the value of the options! For example, if AP Eagers shares rise 13% to 550 cents by January 2003 then the options will be worth 150 cents for a gain of 226%.

Summary and Recommendation

Our quarterly Australian Warrant/Option Analysis has highlighted the under-valued AP Eagers options and the high leverage offered by these securities. The options have been under-valued for several years and although their price has risen over the last three months that increase has lagged behind the appreciation in the share price. The only problem for investors is limited marketability, but the options should be attractive buying up to about 80-90 cents for investors seeking maximum capital appreciation over the next 8½ months from a leveraged play on further capital appreciation in the AP Eagers share price.
