Summary and Recommended Investment Strategy.

Many share prices are extremely under-valued. Sentiment is improving and massive increases in liquidity could ultimately lift markets 5-10 fold to extremes of over-valuation. <u>Investors should be fully invested in shares</u>.

Investment Outlook.

Investor sentiment has improved significantly over the last month, lifting stockmarkets and improving our Technical indicators. Fundamental, Monetary and Economic indicators were *already* favourable, so this has tipped our Stockmarket Forecasts for the Australian and New Zealand markets firmly in favour of higher prices!

The US Federal Reserve also created a further US\$1050 billion in new money - increasing its own overdraft which it uses to buy Treasury Bills and Mortgage backed securities. The public and the media don't understand Economics, but the G20 sent a clear message - smiling politicians (so everything must be OK, right?) and the message that the crisis is all the fault of those over-paid corporate executives, investment bankers, hedge funds, tax havens and credit rating agencies. New rules and regulations will prevent this ever happening again. Does any of that sound familiar to anyone?

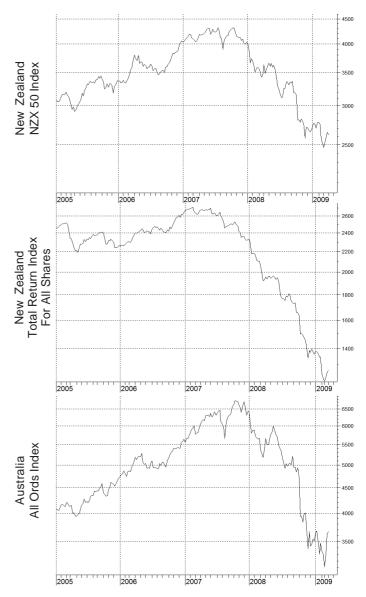

Nevertheless, liquidity will solve the current recession/depression and banking problems . . . although at a future cost. After all, it was excess liquidity - to solve previous crises - that led to today's problems.

Excess liquidity, at a time of little or no economic growth, is also likely to lead to asset price inflation as cash rich investors and institutions aggressively bid to buy existing investments in shares and property. So the solution to the current crisis will likely fuel the next investment boom. Shares could go from today's extreme under-valuation to a level of extreme over-valuation (i.e. markets could rise 5-10 fold) over the next 3-5 years!

Shares are very under-valued today. So even if sentiment was to again deteriorate and even if the recession was to drag on longer than expected, then shares should produce far above average *future* returns over the medium to long term. The real risk is that shares will recover faster and further than anyone expects - and be driven to over-valuation as excess liquidity floods the financial markets. The risk to investors is to be holding cash and left behind, or taking profits far too early as the markets recover.

Stockmarket Forecasts

Australia: One-Month 97% (Bullish) One-Year 71% (Bullish)
New Zealand: 83% (Bullish) 66% (Bullish)

Performance Forecasts

"Performance Forecasts" are computer generated predictions of the relative future price performance of a company's shares over the next three to six months. Performance Forecasts are calculated for every listed NZ share (except Investment Trusts) on a rating scale using the letters "A" (Highest potential for capital appreciation over the next 3-6 months), "B" (Above Average), "C" (Average), "D" (Below Average) and "E" (Lowest). These predictions are NOT buy or sell recommendations, but can be useful to help time planned purchases or sales, or to identify shares worthy of further study and analysis.

Recommended Investments

New Zealand's "Fair Dividend" Rate Tax

Most NZ investors will have <u>no</u> Fair Dividend Rate tax liability for the year ended 31st March 2009. The FDR is the lower of 5% of the value of shares subject to the FDR tax at the start of the tax year (i.e. 1st April 2008, for the tax year just ended) or the total return from those investments (i.e. under the alternative Comparative Value method).

Most investors will have experienced a *negative* total return (i.e. capital losses exceeding actual income) so

will have no taxable income under the FDR tax method!

Investments Subject to the FDR Tax

Most international (i.e. non-NZ) shares and trusts are subject to the Fair Dividend Rate tax. The major exemptions are Australian *companies* included in the All Ordinaries Index, which are subject to income tax on the actual dividends paid.

Challenger Wine Trust has recently been *included* in the All Ordinaries Index, but this is a *trust*, not a company, so still subject to (Continued on Page 4)

New Zealand Shares

Nuplex Industries is seeking to raise \$132.8 million from existing shareholders through a 7 for 1 renounceable cash issue at 23 cents per share. We strongly recommend that investors take up their entitlement to this cash issue as the Nuplex Industries share price has been significantly depressed by its debt convenant problems and the impact of this capital raising.

A further \$22.8 million could be raised if the underwriter exercises a call option to purchase 99 million shares (13% of the company) at 23 cents.

As a result of this cash issue (and call option) the issued capital of Nuplex Industries will increase from 82.5 million shares to around 660-759 million shares. Issuing these shares in a placement to *new* shareholders would result in a massive transfer of wealth away from the *existing* shareholders. The cash issue to existing shareholders at least gives them the opportunity to strengthen the company's financial position and to (approximately) retain their percentage ownership of the company.

A year ago, Nuplex Industries shares traded around \$6, valuing the company at around \$495 million. The current issues will raise up to around \$155 million - so on a full recovery at the end of the current recession the market *could* value the company around \$650 million. With the increased issued capital, that would equal a share price of around 85 cents.

If existing shareholders take up their new shares, then they would eventually experience that recovery on <u>eight times</u> the number of shares originally held. If existing shareholders do <u>not</u> take up the new shares, then 7/8th

(i.e. 88%) of the recovery potential will be transferred to *new* investors through the dilution of the share value.

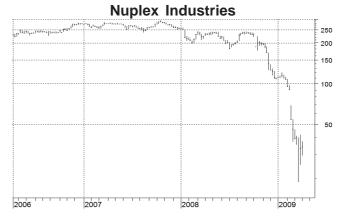

As the cash issue is heavily discounted from the market price of Nuplex Industries shares there is a large "bonus element" in this cash issue. Investors can realise this by taking up entitlements to buy new shares at 23 cents (which have a current value of 34 cents) or by selling some or all of the rights. Do NOT let rights expire!

The "bonus element" in this cash issue is equivalent to reducing our initial cost price from 350 cents to 130.7 cents. This adjustment is based upon the final exentitlement price of 81 cents and the theoretical rights price of 7.25 cents (although actual prices will fluctuate with the share price and the rights are worth 23 cents *less* than the shares). At those prices an investor *could* sell about 76% of the rights and raise enough cash to take up the other 24% of the rights. So, starting with 10,000 shares, an investor would receive 70,000 rights. Selling 53,200 rights at 7½ cents would raise \$3857, which is almost enough to take up the remaining 16,800 rights (for \$3864). This is equivalent to 16,800 "bonus" shares (at no net cost), increasing the investor's holding to 26,800 shares (and reducing the initial cost per share).

We, however, recommend investors take up *all* of the rights - if you have the cash available - as the share price will probably recover in May and June. Payment is due by 20 April.

In the current market, companies seeking to raise capital have their share price marked down sharply - but will likely recover *once the cash issue is completed*. For example, when Ellex Medical Lasers sought to raise capital at 10 cents in February, its share price dipped to around 8.7-9.6 cents - but has since improved to 17 cents!

The \$133-155 million to be raised would allow the company to repay around 30-40% of its interest bearing debts!

Postie Plus Group's revenues were 5.0% lower at \$49.9 million for the six months to 31 January 2009. Continuing operations recorded a 14.7% larger *loss* of \$2,679,000 (*minus* 6.7 cents per share) but the directors predict it is "on track to deliver a modest full year profit". No interim dividend will be paid.

The company recorded a net operating cash *deficit* 2½ times larger at \$2.6 million.

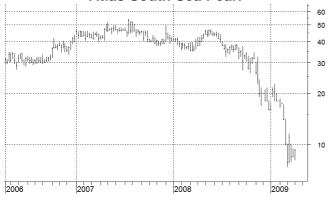

Inventory levels are 30% lower than at the same time a year earlier and the company is entering the winter season with no stock overhang. The group opened five new *BabyCity* stores over the period and now has 21 of these stores.

Australian Shares

(*This section is in Australian currency, unless stated.*) **AJ Lucas Group**, having recently sold its Gloucester Basin coal seam methane assets at 13 times cost, reports that "two more assets will be realised in 2010" and is creating additional CSM assets offshore.

Atlas South Sea Pearl has extended the closing date of its 1 for 3 cash issue until 8 April - to allow more time for their many NZ shareholders to send mail back to Australia. Again, we recommend taking up entitlements to this cash issue and would expect the market price to improve in May and June.

Atlas South Sea Pearl

<u>Challenger Wine Trust</u> - which had put its "distribution guidance on hold pending review" (i.e. corporate speak for suspending dividends) - has announced that it will pay 1.2 cents per unit for the March quarter. Cash earnings remain steady at around 2.4 cents for the quarter, with the payout ratio cut from around 100% to 50% to help finance debt repayment.

As previously announced, the trust is "pursuing asset sales" to reduce debt and leverage, and is "currently in discussions with parties interested in a number of vineyards". The net fair value of interest rate swaps has also remained steady. The distribution suggests asset sales close to book value are likely as further devaluation in asset values would put pressure on loan convenants and require more rapid debt repayment.

Challenger Wine Trust has been added to the All Ordinaries Index, but is still non-exempt and subject to NZ's *Fair Dividend Rate* tax as it is a *trust* and not a company. That means investors will be taxed at the 5% *fair dividend rate*, not the much higher actual income distributions!

<u>Circadian Technologies</u> has signed an agreement with **Healthscope** to commercialise a test to identify the

source of *Cancers of Unknown Primaries* (CUP). CUP accounts for about 4% of all cancers, is the 7th most common in Australia and the 4th most common cause of cancer deaths. The test will help determine the origin of metastatic cancer - quicker, less expensively and with less patient discomfort than existing technologies - and lead to a more appropriate treatments.

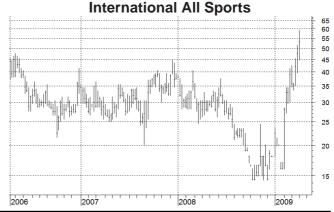

The test should be available within 12-18 months, with Circadian Technologies receiving an upfront and milestone fees, but mainly a large royalty on every test sold. Circadian Technologies will also retain full rights to market the test outside of Australia, *including* any improvements developed by Healthscope.

The company estimates a potential price of US\$1000-2000 per test, with a worldwide market "well in excess of US\$100 million" annually.

<u>Iluka Resources</u> has bought out a couple of joint venture partners. The company has paid \$550,000 to purchase the *Kalli Joint Venture* (which has not yet identified any mineral sands deposits) from **Mithril Resources**. It will also acquire **Basin Minerals**' 10% interest in the *Echo Sands Project* - paying \$350,000 immediately and a further \$400,000 (adjusted for CPI changes) when ore is eventually extracted.

The company has also brought forward the idling of its fourth synthetic rutile kiln in Western Australia, which was scheduled to close in mid-2009. The slightly earlier close is in response to both the "global economic crisis" and "new, higher value rutile production from *Murray Basin Stage II*".

<u>International All Sports</u> is "assessing the options available to the company" in response to **Sportsbet**'s share buying. We reported last month that Sportsbet had acquired a 12.34% interest in International All Sports and that has since grown to 18.5% with further onmarket purchases at prices up to at least 49 cents!

Share Recommendation: Buy Charter Hall Group

BUY Charter Hall Group (code CHC).

Charter Hall Group is a "stapled security" consisting of one unit of **Charter Hall Property Trust** and one share in **Charter Hall Ltd**. The group is involved in property development, property management and property investment - all of which are currently depressed businesses operating in a difficult environment and therefore very *out of favour* with investors and offering excellent value! The group is soundly financed, asset rich with significant property investments, earns recurring income from both property rentals and fees from its property management business . . . with a recovery in development profits possible in the medium to long term.

(Continued on Page 6)

Page 6

BUY Charter Hall Group

(Continued from Page 5)
Company History

The property development and funds management business was established in 1991 and the company launched its first development fund in 1993 with capital raised from private investors. A "core" (i.e. long term property investment) fund was established in 1996. In 1997-in partnership with **AMP**-the company established three "opportunity" (i.e. property development) funds, financed by institutional investors.

In early 2005, the business restructured into its "stapled security" structure, raising around \$190 million from a public issue at \$1.00 per security, plus some additional capital from the existing investors. This money was used to acquire \$266 million of property investments and to establish the group's co-investment in its unlisted property trusts.

Recent Results

In the year to June 2008, the group earned revenues 49.7% higher at \$91.1 million. Pre-tax *trading* profits were 47.6% higher at \$49.3 million. Revaluation gains of \$15.3 million plus a tax benefit of \$3.0 million lifted the net profit 56.4% to \$67,498,000 (16.3 cents per share). The annual distribution - all from its property trust - was 20.7% higher at 12.6 cents.

\$46 million (just over 50%) of the group's income was from recurring property rentals from its investments and distributions from investments in property funds. \$5.4 million (6%) was from interest income. The remaining \$39.6 million (44%) was earned from management fees and performance fees. Management fees are a recurring source of income, but further performance fees are unlikely in the short to current term owing to the depressed property market. So 75-80% of revenues are recurring from property investment and property management base fees.

For the six months to 31 December 2008, revenues declined 15.7% to \$36.0 million, plus there was a \$4.6 million gain on the sale of investments. *Trading* profits

Market Analysis were 20.8% lower at \$23.2 million before fair value losses on property values of \$31.8 million and on derivatives of \$9.8 million, plus a tax benefit of \$1.7 million resulted in a net *loss* of \$16,633,000 (*minus* 3.8 cents per share).

"Underlying Earnings" - excluding property gains and asset write-downs - were \$20.9 million (4.8 cents per share).

An interim distribution of 3.96 cents was paid in February and the company has downgraded its full year result to underlying earnings of 8.0 cents and an annual distribution payout of 5.0 cents.

Over the half year, at least 74% of revenues (i.e. 46% from rental income and 28% from property management base fees) was recurring.

Financial Position

At June 2008 the group had \$245.5 million invested in its unlisted property trusts plus \$439.6 million in direct property investments. Interest bearing debts were \$261.0 million.

Over the six months to 31 December the company reduced its direct property investments, selling down its investment in the **Charter Hall Core Plus Retail Fund** (CPRF) from 100% ownership to 62%, with the proceeds used to reduce the parent company debt.

As a result direct property investments have reduced from \$439.6 million to \$41.0 million, with parent company interest bearing debts reducing from \$261.0 million to just \$69.0 million (currently under a \$100 million facility until July 2011). Investments in funds increased from \$439.6 million to \$530.9 million (owing to the reclassification of its interest in CPRF).

Parent company interest debts therefore are just 11% of total assets, although "look through gearing" (i.e. including its share of assets and debts of the unlisted property trusts) was 48.6% at the end of December (and has subsequently reduced to 46.5% with the sale of two other properties to two of the managed funds). Further sales of both direct property investments, plus properties held in its managed funds, are planned to further deleverage the company and the funds.

CH Opportunity Fund 4 ¹	\$3.1	3%	\$165M for	r eight developm	nents worth \$889M.
CH Opportunity Fund 5 ¹	\$17.5	15%	\$300M, ca	ılled up \$122M 1	for 5 projects worth \$920M.

Notes:

1. Wholesale funds with minimum investment of \$5,000.000.

\$530.9

2. Retail funds with minimum investment of \$5.000.

Overall the properties in the group's funds have an average of over 8½ years to run on leases, with average rental increases of around 3.6% per annum. All funds are operating within loan covenants. Property values would have to fall 6-29% to breach Loan-to-Value covenants and strategic asset sales are being sought to further reduce debt levels.

Investment Criteria

Based upon the full year results to June 2008, at 31 cents Charter Hall Group's stapled securities trade on a Price/Earnings ratio of 1.9 and offer a Yield of 40.6%. <u>Based upon its forecast "underlying earnings"</u> (i.e. excluding asset write-downs and mark to market losses on interest rate hedges) the P/E will be under 4 *this* year and based upon its forecast distribution the Yield will be 16.1%.

Most trading profits are earned from recurring property rentals from long term leases and from property management base fees (of around 0.45% of assets under management). So "underlying earnings" should be fairly reliable, despite little or no contribution from development profits or performance fees, and excluding fluctuations in market values of property assets.

The net asset backing is around 109 cents, so the securities trade at a 72% discount to the net value of its property portfolio! Property values *may* weaken further *if* the recession drags on for longer than expected, but a 72% discount would appear to *over-anticipate* even the most pessimistic view of the recession. <u>In normal circumstances</u>, net assets would be a fair value for the shares or units of a property investment trust!

The group, however, also includes a Funds Management business. This manages \$3,900 million of property assets for the group's unlisted property trusts, producing management base fees of around \$20 million annually (and - in normal times - targeting performance fees of a further \$15-25 million). Funds Management is a cyclical business which might be worth anywhere from \$40-200 million (8-40 cents per share). Clearly the market value of this Fund Management business would currently be near the lower end of that valuation, but would increase significantly in an economic recovery.

The group seeks to earn up to a 20½-21½% Return on Shareholders Equity, 11-12% from its investment in property funds, 4½% from base management fees (at 0.45% of assets under management) and a potential 5% from performance fees (at about 0.50% of assets under management). On current net assets of 109 cents, that would produce earnings per share of 22-23 cents.

The issued capital is 518,504,964 stapled securities, so at a price of 31 cents the market capitalisation is just \$161 million.

Where the directors and management have a significant investment in a company their interests are aligned with those of the public shareholders and these companies tend to be more attractive investments than company's where the directors and management have little or no financial stake.

Founder and joint Managing Director D Southon has 12,083,704 securities (2.3% of the group), including 5,310,501 securities held through the Executive Loan Security Plan (ELSP) which are subject to various performance and service criteria. Joint Managing Director D Harrison has 11,987,083 securities (2.3%), of which 5,693,445 are held through the ELSP. Co-founder and Executive Director C Fuchs owns 7,778,480 securities (1.5%), of which 2,671,404 are through the ELSP.

The ELSP holds a further 11.1 million securities for other group executives.

The non-executive Chairman has 50,000 securities and the Deputy Chairman owns 66,666 securities. A

third non-executive director G Fraser owns 796,283 securities and a fourth owns no securities in Charter Hall Group.

Over the last year *insiders* have made three buys and one sell. C Fuchs sold 80,000 securities in April 2008 at \$1.45 each. G Fraser purchased 50,000 stapled securities at 84-85 cents in early October 2008, 100,000 securities at 53 cents in late October and 200,000 securities at 28 cents in December 2008.

The shares are fairly widely held by institutional investors, with over a dozen institutions owning over two-thirds of the group. The group is also relatively widely followed by five brokers who prepare profit forecasts. Normally we prefer *neglected* shares which tend to be under-valued - but at present just about anything and everything is under-valued!

Technically the shares are fairly weak, with a Relative Strength rating of -37.7%, ranked 86 (on a scale of 0-99). Normally we look for shares in stronger uptrends - with a *positive* strength rating and ranked between 0-49 - but at a stockmarket bottom the *weakest* shares will be the most over-sold and likely to recover most rapidly.

Summary and Recommendation

The best *future* investment returns usually come from investing in *out of favour* shares in *out of favour* companies in *out of favour* industries. At present, Funds Management, Property Development and Property Investment is about as *out of favour* as you can find.

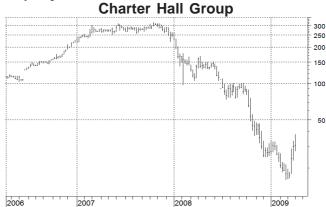

Consequently, we can currently buy Charter Hall Group stapled securities at a 72% discount to the current (depressed) market value of its net property investments. And we get the \$40-200 million Funds Management business thrown in for free!

At the depressed profit levels and significantly reduced dividend expected this financial year we are still only paying a P/E of 3.8 and will receive an immediate income yield of 16.1%.

The recession will not last forever . . . after which profits and dividends should recover and the share price could get back around \$2 to \$3 per share - for a 6½-10 fold capital gain!!

Even if it takes 10 years - an *extremely* pessimistic outlook - that is a *far above average* 21-26% per annum compound rate of capital appreciation. Add in the 16.1% income yield and the potential total return is 38-43% per annum over a decade!

An investment in Charter Hall Group does involve risks . . . but with the potential for very high returns and this does look like one of the better investments in this very depressed sector!

Page 8 Market Analysis

"Insider" Trades in Australian Shares

The table below shows the number of Purchases and Sales of a company's shares by its Directors over the last twelve months (excluding "Neutral" situations where the number of Buyers and Sellers were equal). Shares where many "insiders" have been buying can outperform the market for up to two years, while shares where many "insiders" have sold can under-perform for a similar period.

"Insider" Trades in NZ Shares

The table below shows the number of Purchases and Sales of a company's shares by its Directors over the last twelve months (excluding "Neutral" situations where the number of Buyers and Sellers were equal). Shares where many "insiders" have been buying can outperform the market for up to two years, while shares where many "insiders" have sold can under-perform for a similar period.

Computer Selections of Australian Shares based upon our Comprehensive Share Selection Criteria

For an explanation of this table see the *Share Selection Methods* report available from our website. These shares are not formal "buy" and "sell" recommendations, but the "Under-Valued", "Best Performing" and "Income" shares should be considered for purchase, while the "Over-Valued" and "Worst Performing" shares can generally be sold to release money for re-investment in more attractive shares.

Computer Selections of NZ Shares based upon our Comprehensive Share Selection Criteria

For an explanation of this table see the *Share Selection Methods* report available from our website. These shares are not formal "buy" and "sell" recommendations, but the "Under-Valued", "Best Performing" and "Income" shares should be considered for purchase, while the "Over-Valued" and "Worst Performing" shares can generally be sold to release money for re-investment in more attractive shares.
